

Tonye Maxwell Kentebe

Brampton, Canada | (647)-965-5159 | tmkenteb@uwaterloo.ca

EDUCATION

University of Waterloo | BAsC in Computer Engineering

Waterloo, Canada

Velocity coop problem award, President's Scholarship, Excellent standing

WORK EXPERIENCE

Software Engineer – Bimo Technologies

Remote / International | 4/2024 – 8/2024

- Developed and maintained **full-stack software systems** using **Python, JavaScript, SQL, and backend development practices**
- Built and optimized **application features, APIs, and technical workflows** supporting scalable digital platform operations
- Collaborated with **cross-functional engineering teams** on debugging, deployment coordination, software testing, and iterative feature development
- Supported infrastructure, technical documentation, and **system optimization** tasks in fast-paced startup environments

Lead Web Developer – Synsyma Technologies

Brampton, Canada | 1/2025 – 4/2025

- Developed responsive **web applications** and technical platforms using **HTML, CSS, JavaScript, Python, and database-integrated workflows**
- Assisted with **frontend development, backend support, workflow automation, and technical system optimization**
- Collaborated with multidisciplinary teams to support scalable digital solutions, technical reporting, and project coordination
- Participated in **software troubleshooting, feature implementation, and engineering-focused technical problem solving** under project deadlines

Geotechnical Engineering Assistant — Paterson Group

Mississauga, Ontario | Fall 2025

- Conducted **lab testing, data collection**, engineering inspections, and analytical evaluations for infrastructure-related projects
- Used **AutoCAD, Microsoft Office, and structured technical reporting tools** to support engineering operations and project coordination
- Worked in fast-paced technical environments requiring troubleshooting, independent problem solving, and operational coordination
- Supported multidisciplinary engineering teams through testing workflows, site investigations, and systems-focused technical tasks

PROJECTS

Embedded Sensor & Circuit Systems Project

9/2025 – Present

- Designed and tested embedded sensing systems involving load cells, op-amps, analog circuitry, and hardware control systems
- Developed Python-based data acquisition and visualization workflows for analyzing system behavior and sensor performance
- Applied systems analysis, troubleshooting, and control-oriented engineering methods to improve functionality and reliability
- Supported experimentation, technical validation, and structured performance evaluation for real-world hardware systems

Midnight Sun Solar Car Team – Hardware Team

3/2025 – Present

- Contribute to development and testing of technical systems for a high-performance solar vehicle focused on efficiency and reliability
- Assist with **hardware integration, diagnostics, embedded systems tasks, and collaborative engineering problem solving**
- Work with multidisciplinary engineering teams to support system optimization, technical workflows, and project execution
- Participate in testing, troubleshooting, and structured technical development activities in fast-paced environments

Additional Information

Programming Languages: Python, C++, JavaScript, SQL, HTML, CSS

Frameworks & Technologies: React, REST APIs, Backend Development, Frontend Development, Database Management, Git

Cloud & Infrastructure: GCP, Azure, AWS, Workflow Automation, Enterprise Platform Integration

Software & Data Tools: Power BI, Tableau, Data Processing, Data Visualization, Technical Reporting, Software Debugging

Engineering & Technical Tools: AutoCAD, Autodesk Civil 3D, Tinkercad, Blender, Vehicle Tracking, InfraWorks, SolidWorks, Blender Microsoft Office Suite, Google Workspace

Professional Skills: Cross-Functional Collaboration, Agile Development Support, Technical Documentation, Problem Solving, Fast-Paced Startup Environments

Certifications & Learning: Harvard CS50 Coursework, Self-Directed C++ Development, Full-Stack Software Engineering Projects

Professional Strengths: Problem Solving, Analytical Thinking, Fast Learner, Technical Communication, Teamwork, Time Management

Interests: Debating and Writing (current project, The Molarity of Power (strategy, systems, and influence analysis),

Field qualifications: Valid Ontario G Driver's License, Own Transportation, Strong technical communication and documentation
